

Municipal bond opportunities across the yield curve

Different parts of the yield curve or credit spectrum may offer various risk and reward characteristics. Municipal bond mutual funds offer tax-exempt income and may help dampen volatility in a diversified¹ portfolio.

Municipal yield curve maturity ranges

— Refinitiv MMD scale for AAA-rated general obligation municipal bonds

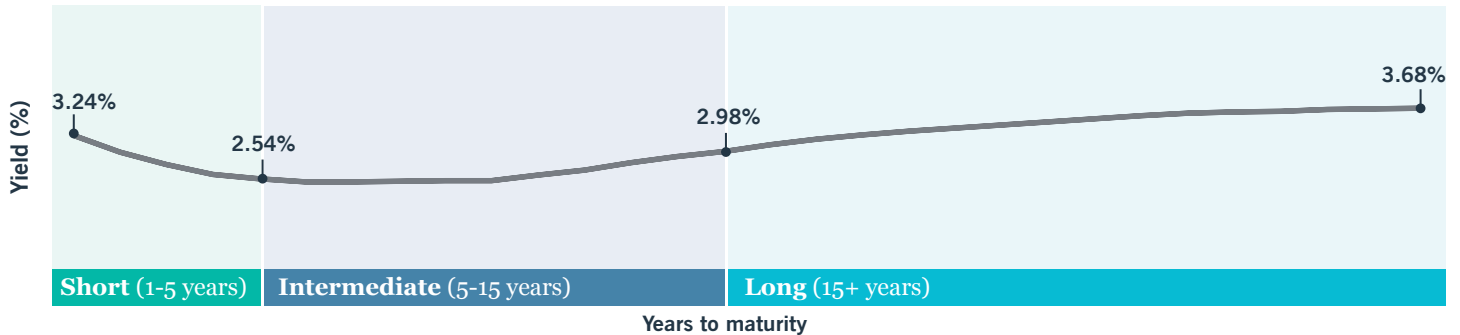

Chart does not represent the credit quality, yield or past performance of any Nuveen fund.

Past performance does not predict or guarantee future results. Data source: Refinitiv MMD. The illustration does not reflect the impact of taxes, fees and other transaction costs that would otherwise lower results. Different benchmarks, economic periods, methodologies and market conditions will produce different results. There is no assurance that any asset class or index will provide positive performance over time.

Performance data shown represents past performance and does not predict or guarantee future results. Investment returns and principal value will fluctuate so that shares redeemed may be worth more or less than their original cost. Current performance may be higher or lower than the performance shown. Total returns for a period of less than one year are cumulative. Returns without sales charges would be lower if the sales charges were included. Returns assume reinvestment of dividends and capital gains. For performance current to the most recent month-end visit nuveen.com. Performance shown for benchmark since inception is as of the Fund's oldest share class.

Some income may be subject to state and local taxes and to the federal alternative minimum tax. Capital gains, if any, are subject to tax.

Class A Shares have a 2.5% maximum sales charge (3.0% for the Intermediate Duration Municipal Bond Fund and Strategic Municipal Opportunities Fund; 4.2% for All-American Municipal Bond Fund and High Yield Municipal Bond Fund). Class I shares have no sales charge and may be purchased by specified classes of investors.

Expense ratios are based on the Fund's most recent fiscal year end. The net expense ratio excludes credits earned on the Fund's cash on deposit with the custodian bank, if any. For the Short Duration High Yield Municipal Bond Fund, Strategic Municipal Opportunities Fund, All-American Municipal Bond Fund, and High Yield Municipal Bond Fund, the net expense ratio includes interest expense and fees paid on Fund borrowing and/or interest and related expenses from inverse floaters. See prospectus for details.

The SEC 30-day yield is computed under an SEC standardized formula and is based on the maximum offer price per share. Subsidized (Sub.) yields reflect fee waivers in effect. Without such waivers, yields would be reduced. Unsubsidized (Unsub.) yields do not reflect fee waivers in effect.

Hlavin and Timothy T. Ryan continue to serve as portfolio managers of the Fund; Nuveen Strategic Municipal Opportunities Fund: Daniel J. Close and Stephen J. Candido were named as portfolio managers of the Fund. Timothy T. Ryan continues to serve as portfolio manager of the Fund.

Important information on risk

Mutual fund investing involves risk; principal loss is possible. Debt or fixed income securities such as those held by the funds, are subject to market risk, credit risk, interest rate risk, call risk, tax risk, political and economic risk, and income risk. As interest rates rise, bond prices fall. Credit risk refers to an issuer's ability to make interest and principal payments when due. Below investment

grade or high yield debt securities are subject to liquidity risk and heightened credit risk. The funds' use of inverse floaters creates effective leverage. Leverage involves the risk that the funds could lose more than its original investment and also increases the funds' exposure to volatility, interest rate risk, and credit risk.

In addition, the **Nuveen High Yield Municipal Bond Fund** concentrates in non-investment-grade and unrated bonds with long maturities and durations which carry heightened credit risk, liquidity risk, and potential for default. The fund oftentimes engages in a significant amount of portfolio leverage and in doing so, assumes a high level of risk in pursuit of its objectives. The **Nuveen All-American Municipal Bond Fund** periodically engages in a moderate amount of portfolio leverage and in doing so, assumes a higher level of risk in pursuit of its objectives. The **Nuveen Short Duration High Yield Municipal Bond Fund** concentrates in non-investment grade and unrated bonds with shorter maturities and durations which carry heightened credit risk, liquidity risk, and potential for default. In addition, the Fund may engage in a moderate amount of portfolio leverage and in doing so, assumes a higher level of risk in pursuit of its objectives.

The information provided does not take into account the specific objectives or circumstances of any particular investor, or suggest any specific course of action. Investment decisions should be made based on an investor's objectives and circumstances and in consultation with his or her advisors.

Glossary

Average effective maturity is a weighted average of all the stated maturities of the bonds in a portfolio except in cases where the bond

has been advance-refunded and secured by an escrow to an earlier redemption date, or where the bond is subject to an optional or mandatory tender or put provision. **Effective duration** is for a bond with an embedded option when the value is calculated to include the expected change in cash flow caused by the option as interest rates change. This measures the responsiveness of a bond's price to interest rate changes, and illustrates the fact that the embedded option will also affect the bond's price. The **S&P Municipal Bond Short Index** consists of bonds in the S&P Municipal Bond Index with a minimum maturity of 6 months and a maximum maturity of 4 years. The **S&P Municipal Bond Short-Intermediate Index** consists of bonds in the S&P Municipal Bond Index with a minimum maturity of 1 year and a maximum of 7.999 years. The **S&P Municipal Bond Intermediate Index** consists of bonds in the S&P Municipal Bond Index with a minimum maturity of 3 years and a maximum maturity of 15 years. The **S&P Short Duration Municipal Yield Index** consists of bonds maturing in 1 to 12 years and is structured so that 70% of the market value of the index consists of bonds that are either not rated or are rated below investment grade, 20% are rated BBB/Baa, and 10% are rated single A. The **S&P Municipal Bond Index** is a broad, market value-weighted index that seeks to measure the performance of the U.S. municipal bond market. The **S&P Municipal Yield Index** is structured so that 70% of the market value of the index consists of bonds that are either not rated or are rated below investment grade, 20% are rated BBB/Baa, and 10% are rated single A. **It is not possible to invest directly in an index.**
